Topic:

An award rendered by an arbitral tribunal in investment treaty arbitration is often not the end of the journey. Dissatisfied parties often seek to annul non-ICSID arbitral awards at the seat of arbitration, or resist their recognition and enforcement at the location of the assets. The panelists will present a continental panorama of legal regimes for annulment of arbitral awards in France, Sweden, the Netherlands and Switzerland, focusing on recent court decisions that made the headlines of mainstream press. They will also discuss the legal reform for recognition and enforcement of arbitral awards in Ukraine and highlight a recent court decision that put it to test.
