

International Transactions Program

JUNE 18, 2018

On June 18 at Winston's Silicon Valley office, London partners Peter Crowther and Nicholas Usher and Los Angeles partner Eva Davis hosted a lunchtime discussion on the latest developments in international corporate transactions and antitrust/competition law.

Among other topics, they discussed current market practices for U.S. companies doing transactions in Europe, as well as key takeaways from some of the recent matters they have handled. Of particular note, Peter and Nicholas recently received one of the UK's most prestigious legal awards for their representation of a major U.S. technology corporation in its successful acquisition of the UK's emergency services (911) network.
