

## Bureau of Safety and Environmental Enforcement and Bureau of Ocean Energy Management Oversight of Offshore Wind Projects

MARCH 21, 2019

As demonstrated in the recent record-breaking lease sale in Massachusetts, the development of offshore wind projects in the U.S is increasingly active, and a number of large-scale projects are underway. U.S. government policies and regulations continue to play a key role in offshore wind farm development. Winston & Strawn, along with Business Network for Offshore Wind and Marine Log, will lead a series of interactive discussions with U.S. government officials and industry authorities on regulatory issues affecting the construction and financing of offshore wind projects in the U.S.

The third topic, “Bureau of Safety and Environmental Enforcement (BSEE) and Bureau of Ocean Energy Management (BOEM) Oversight of Offshore Wind Projects,” took place on March 21, 2019. Winston partners was joined by Joanna Brinkman, U.S. Department of the Interior, Office of the Solicitor, Branch of Offshore Resources, Sid Falk, U.S. Department of the Interior, Bureau of Ocean Energy Management, Office of Renewable Energy Programs, and Joshua M. Kaplowitz, U.S. Department of the Interior, Office of the Solicitor, Branch of Offshore Resources.

[Contact Winston & Strawn for more information about this event.](#)

A webinar is a complimentary interactive seminar offered by Winston & Strawn LLP over the Internet. You'll watch and listen to the presentation at your own computer.

Additional webinars in this series include:

- [“The U.S. Coast Guard’s Oversight Roles During the Implementation Phase of Offshore Wind Projects”](#)
- [“Jones Act Compliance and U.S. Offshore Wind Projects”](#)

*Clients and friends of the firm are invited to attend seminars and events. We reserve the right to limit attendance at any firm event.*
