

The Second Coming of FinTech – Regulatory and Antitrust Considerations with Artificial Intelligence and Blockchain

JUNE 27, 2019

Winston Announces Results of FinTech Survey

Artificial intelligence (AI), blockchain, and other disruptive technologies are here to stay, but these technologies continue to develop faster than regulators can keep up. The financial services industry has always been quick to embrace technology-based innovation and in many ways is already ahead of other participants.

This year, ALM conducted a survey in conjunction with Winston & Strawn to capture the thoughts and opinions of in-house legal professionals regarding the latest legal and regulatory developments driving FinTech, AI, and other disruptive technologies in the financial services sector. The results are in! Today, 73 percent of financial services companies are using one or more disruptive technologies.

The webinar on June 27, 2019 addressed the following topics:

- The results of ALM's survey addressing the thoughts and opinions of in-house legal and technology professionals
- The regulatory and antitrust considerations for financial services companies taking advantage of the growth opportunities related to artificial intelligence and blockchain

Save the Date – Winston's Second Annual Disruptive Technologies Summit on September 12, 2019, at Santa Clara University School of Law's High Tech Law Institute.

View and listen to the presentation from the second webinar in the series [here](#).

The [third webinar](#) in the series will be presented on October 24, 2019.
