

# What Nordic Companies Should Know About Trade Secrets

FEBRUARY 26, 2020

Businesses in the Nordics are no stranger to trade secrets. Both Sweden and Finland updated national laws following the EU Trade Secrets Directive Act in 2018, along with a myriad of new legislation in other parts of the world, all calling for more sophisticated and innovative approaches to trade secret protection.

On February 26, Co-Chair of Winston's Global Privacy & Data Security Task Force, Steve Grimes, and former leaders of our Nordic practice, hosted another installment of The Nordic Sessions webinar series. The webinar offered a fresh look at the legal and geopolitical evolution of trade secret protection in the U.S. and Asia, along with practical considerations for Nordic businesses to safeguard their most valuable information.
