

CLIENT ALERT

Resources for Health Care Providers/Services on COVID-19

MARCH 17, 2020

As the COVID-19 pandemic develops across the United States, our health care and life sciences team has collected a range of useful international and federal and state government resources for health care providers and health care services businesses as they navigate the significant issues that have arisen relating to patients, clients, and staff. These resources, listed below with hyperlinks, relate to guidance on regulatory requirements, infection, and quality control, and other significant public health resources. This is not an exhaustive list but we hope it is a helpful guide to the most pertinent resources available.

The pace of change on relevant guidance and actions that federal, state, and local governments are taking to combat the pandemic is significant. We will continue to monitor material developments and keep you informed. We also urge you to keep up to date on these resources as they change.

If you have additional questions, need assistance with COVID-19-related matters or other health law-related matters, please feel free to be in touch with our health care and life sciences team leads listed below or your Winston relationship attorney.

Federal Government Resources

- Centers for Disease Control and Prevention (CDC)
