

# What is Your Mother's Maiden Name?

SEPTEMBER 24, 2020

On September 24, members of Winston & Strawn's Privacy and Data Security and Employee Benefits and Executive Compensation practices hosted a timely webinar discussion on the current privacy and security trends affecting retirement benefit plans.

The panelists discussed ways in which plan sponsors and fiduciaries can take meaningful steps to protect employee benefit plans from cyber criminals. Additionally, they addressed best practices, insurance options, the impact of fraud on both employee benefit plans and participants, the ways in which service providers are responding to these risks, and the increase in litigation against plans in the wake of these fraudulent withdrawals.
