

Winston's Panel at DT Legal Summit Featured in LegalTech News

OCTOBER 5, 2020

Winston's "Focus on Data Security by Design—Protecting Internet of Things (IoT) Devices & Emerging Technology" panel, held virtually during Winston & Strawn and Berkeley Center for Law & Technology's [Disruptive Technologies Legal Summit](#), was featured in LegalTech News. Panelists discussed the emerging U.S. and international laws aiming to regulate the Internet of Things (IoT) market.

As the IoT market and their lawyers closely watch the fate of the Safe Data Act, Winston's Global Privacy and Data Security Task Force Co-leader Sheryl Falk observed that there are other regulatory developments to follow concerning IoT devices. She noted the United Kingdom's pending IoT framework, Brazil's IoT plan, and a U.S. bill proposing to regulate federal government-purchased IoT devices are also significant.
