

## Podcast Trial Alert: *VLSI Technologies v. Intel* II — Jury Trial Day 2

APRIL 14, 2021

Day 2's Order of Play was:

- Plaintiff's case-in-chief
  - Michael C. Brogioli, Ph.D., Infringement Expert
  - Dr. Murali Annavaram, Testing Expert
  - Deposition designations for several Intel witnesses

It became clear that as to both asserted patents, VLSI's infringement allegations centered on the "FIVR," or fully integrated voltage regulator, feature of the accused chips. According to VLSI, Intel added the FIVR feature to the chips in 2013, which was highly valued by Intel customers. Dr. Annavaram testified that, according to tests he did using Intel benchmark tools, the accused FIVR feature greatly increased the performance of the accused chips. Today, VLSI's damages expert Dr. Sullivan will testify.

To learn more about Day 2, please listen to DaWanna McCray's interview of Danielle Williams, who listened to the trial telephonically.
