

Charlie Papavizas Discusses Legal Issues Arising from Floating Wind in *Riviera Maritime Media*'s "Floating Wind: The New Energy Frontier in the U.S."

JULY 11, 2023, 8:00 AM

On July 11, 2023, Winston & Strawn Partner and Maritime Chair Charlie Papavizas spoke on the "Floating Wind: The New Energy Frontier in the U.S." panel, part of *Riviera Maritime Media*'s Offshore Energy Webinar Week.

Floating offshore wind is the next frontier in renewable energy and is essential for the U.S. West Coast, where water depths preclude bottom-founded wind turbines. The webinar brought together a panel of leaders in offshore wind to address current opportunities and challenges for the U.S., exploring some of the issues arising from floating versus fixed wind structures. Papavizas also led a discussion on some of the threshold jurisdictional and other legal issues arising from floating wind.
