

# Cybersecurity 101: Best Practices for Attorneys to Protect Their Companies and Clients (And Themselves) in 2023

SEPTEMBER 20, 2023

On September 20, 2023, Winston's [Regulated Personal Information Practice](#) attorneys [Kevin Simpson](#) and [Eric Shinabarger](#) hosted a hybrid Cybersecurity 101 program that focused on cybersecurity trends and regulations affecting private practice and in-house attorneys and companies. The program included an overview and analysis of high-profile privacy and cybersecurity regulations, including requirements and compliance insights under the NY SHIELD Act, 23 NYCRR 500 (NYDFS Cybersecurity Regulations), NYC Biometric Law, state and federal wiretapping claims, and state privacy laws, as well as data breach response and more.

The speakers also discussed cybersecurity best practices for attorneys to keep in mind as they advise their companies and clients, while also protecting their own practices. The speakers' key takeaways emphasized that attorneys must:

- Understand where cybersecurity risks exist
- Address potential sources of risk
- Be prepared to act
