

Nuclear Decommissioning: What You Need to Know Now

FEBRUARY 12, 2014

Winston & Strawn hosted an eLunch titled “Nuclear Decommissioning: What You Need to Know Now” on Wednesday, February 12, 2014 at 11:15 – 12:30 p.m. (Central).

A number of nuclear plants in the U.S. have recently closed or announced plans to close. While the reasons vary from plant-to-plant, including competition from cheap natural gas, costly new regulations, and regulatory uncertainty, they have one thing in common: all of them must eventually undergo decommissioning. The decommissioning process involves a host of new economic, regulatory, and political challenges for plant owners, but also presents opportunities to expand decommissioning-focused businesses.

Winston & Strawn’s nuclear practice group partner Bill Horin discussed the status of recent plant closure announcements, an overview of the U.S. Nuclear Regulatory Commission’s decommissioning process, and recent developments surrounding power reactor decommissioning and decommissioning funding.

[Contact Winston & Strawn for more information about this event.](#)

An eLunch is a complimentary, interactive seminar where participants watch and listen to a presentation given by Winston & Strawn attorneys over the Internet.

Clients and friends of the firm are invited to attend seminars and events. We reserve the right to limit attendance at any firm event.

NOTE: CLE credit is not available for listening to our pre-recorded eLunch or webinar briefings.
