

WEBINAR

European Lending Market H1 2025 – CRE Data: What's Happening in RE Debt Markets in Europe (2025 Update)

22 JULY 2025, 2:00 P.M. BST

Join us for an insightful webinar during which Dr. Nicole Lux (of Bayes Business School) and Denis Moscovici and Christopher Puyraimond (both of IEIF) will 'deep dive' into key data sets emerging from commercial real estate lending market activity in H1 2025 across Western Europe and the Nordics, with a particular focus on France. Winston partner Aparna Sehgal, in conversation with our presenters and panellists, will look at trends and projections emerging from the information analysed, including what to expect for the rest of 2025. We'll also look at European debt availability and explore the most pressing financing issues of the day.

In light of the volume of data to be shared, we encourage you to send your questions through in advance by email to [Claire Henderson](#), so these can be picked up over the course of the discussion.
