

From Policy to Practice: Building Corporate AI Playbooks and Workflow

AUGUST 14, 2025

On August 14, our Charlotte office hosted a CLE discussion, From Policy to Practice: Building Corporate AI Playbooks and Workflow. We greatly appreciate your participation, and we are happy to be your strategic advisors in your AI journey as this exciting area continues to evolve.

Our panelists highlighted a range of practical topics designed to help in-house counsel and legal professionals develop and implement effective AI strategies, including:

1. **Establishing AI Governance:** Best practices for structuring internal AI committees and governance frameworks to oversee the adoption, implementation, and ongoing stewardship of generative AI
2. **Crafting Acceptable Use Policies:** Key elements for developing clear, compliant, and enforceable AI use policies tailored to your organization's needs.
3. **Vendor Due Diligence:** Essential considerations for evaluating AI vendors, with a focus on transparency, security, and risk alignment

Thank you to all who joined us for an engaging discussion. We hope you can join us for our upcoming webinar on transcription tools and change management—two key topics for responsible AI adoption.

If you have specific questions or would like to discuss these areas further, we encourage you to reach out directly to [Bobby Malhotra](#) or your Winston Charlotte relationship partner.
