

Precision Aviation Group - Acquisition of Helicopter Engine Repair Overhaul Services

NOVEMBER 7, 2025

A team led by Austin Leach and Justin Levy represented Precision Aviation Group (PAG) in its acquisition of H.E.R.O.S., a premier Rolls-Royce M250/RR300 engine MRO provider, and its affiliate, Hye-Tech Manufacturing.

The acquisition, which was completed on November 7, 2025, boosts PAG's presence in the helicopter engine MRO space by adding a highly specialized, Rolls-Royce M250/RR300 hub with top-tier technical expertise and a global customer reach. Winston attorneys across multiple practice areas, including M&A, Tax, Environmental, and Employee Benefits, helped structure a successful transaction to support PAG's long-term growth strategy and sustained expansion in the aerospace sector.
