

20 MAY 2026, 2:00 PM – 3:00 PM BST

Join Winston partner Aparna Sehgal for a conversation marking the release of a new European Commercial Mortgage Index (ECMI), an industry partnership between the [Bayes Business School's CRE Debt Project](#) and [FinLoop](#), featuring Q1 2026 data.

The ECMI provides the first comprehensive analysis of the cost of European commercial mortgage finance, using loan-level data supplied by multi-manager borrowing institutions. The index tracks fixed- and floating-rate loans held on the balance sheets of institutional lenders across Europe, including banks, insurers, pension funds, and private credit.
