

Decoding AI – Strategy to Safeguards: Making AI Governance Work in 2026

MAY 7, 2026, 12:00 PM - 1:00 PM ET

Join us for a practical discussion on how companies are building AI governance programs that work for their businesses and hold up under legal scrutiny.

In this webinar, we'll discuss:

- AI governance vs. data governance—and why the distinction matters for legal teams
- Protecting privilege, trade secrets, and sensitive information in AI-assisted workflows
- Building and using risk assessment frameworks that drive decisions
- Why AI vendor diligence is fundamentally different from traditional IT procurement—and how to update your playbook
- Key U.S. and global regulatory trends shaping AI adoption in 2026—we'll map the landscape companies must monitor now
- Common challenges around vendor diligence, transparency, and accountability
- Practical guidance for building a scalable, cross-functional AI governance program
- Emerging liability use cases
- High-risk and specialized use cases on the horizon

This session is designed for in-house counsel, outside advisors, compliance, and technology professionals who support and oversee the evaluation, onboarding, and monitoring of AI tools and who need concrete strategies for governing AI adoption.
