

## Winston & Strawn Recognized for Patent Litigation by *Corporate Counsel*

NOVEMBER 23, 2011

Winston & Strawn's rapidly growing patent litigation practice garnered a 5th place ranking in *Corporate Counsel's* "2011 Patent Litigation Survey," which tracks the most active U.S. patent litigation practices. The *Corporate Counsel* survey is the most reliable measure of market share in this practice area, and this achievement is a significant indicator of Winston's growing prominence as a national patent litigation practice. The firm has steadily moved up in these rankings, having come in 13th last year, and 20th the year before that. Important factors in the firm's showing are the continuing dominance of our pharmaceutical patent litigation practice, the emergence of the our electronics and energy practices, and the addition of lateral partners in our New York, Washington D.C., Chicago, Houston, and Los Angeles offices from firms including Howrey, O'Melveny and Meyers, Milbank Tweed, and Dickstein Shapiro.
