

# Decommissioning, Decontamination and Demolition of Power Plants

SEPTEMBER 6, 2012

Winston & Strawn and Environmental Resources Management (ERM) hosted a joint webinar on power plant Decommissioning, Decontamination and Demolition (“DDD”) on Thursday, September 6, 2012.

This presentation discussed the regulatory drivers associated with coal plant shutdown decision-making as well as repowering due to the low cost of natural gas. The speakers also discussed the strategy around DDD’ing a plant, the risks and benefits, as well as the legal issues around land and liability transfers. Specifically, the webinar addressed:

- Current and Future Air Regulations Driving Shutdowns and Repowering
- Other Environmental Requirements and Land Transfer Liabilities to Consider in Repurposing
- Know the Type and Value of Your Assets & Maximize the Return on Your Assets
- Keys to a Successful DDD Project & Common Missteps

Winston & Strawn environmental partner [Eleni Kouimelis](#) was joined by Karl Klotzbach of ERM.

NOTE: CLE credit is not available for listening to our pre-recorded eLunch or webinar briefings.
